EDUCATION

Missouri State University

Bachelor's of Science in Computer Science, Minor in Mathematics

Aug. 2021 – Dec 2024

Springfield, MO

EXPERIENCE

Software Engineering Intern

OMNI RTLS

May. 2024 – Dec 2024

Springfield, MO

- Developed a real-time application that tracks the movement and status of targets in real-time.
- Utilized the Google Maps API to visualize the target and create an action-driven event for reporting abnormalities
- Developed responsive web applications using Angular framework, Tailwind CSS, and JavaScript.
- Developed and maintained RESTful APIs using ASP.NET with Entity Framework for web application backend.

Summer Research Assistant

Missouri State University

May 2024 – Aug 2024

Springfield, MO

- Applied statistical models to analyze and identify key data patterns, driving insights for research projects.
- Collected, cleaned, and preprocessed data, applying feature engineering to improve quality.
- Investigated the use of Graph Neural Networks (GNN) and Graph Attention Neural Networks (GANN) for real-time scene graph classification, exploring their potential for improving classification accuracy.

Access Technology Center - Student Worker

Missouri State University

Feb 2022 – May 2024

Springfield, MO

- Utilized the Axe (Browser Extension) to check the compliance of university web pages with Web Content Accessibility Guidelines (WCAG) 2.0.
- Supported students with special needs by resolving technical issues and enhancing technology access.
- Assisted in training new student worker on best practices for creating accessible educational content.

PROJECTS

Micro Code | ASP.NET, Postgresql, C#, React, Docker, Git

January 2024 – August 2024

- Developed a full-stack online code compiler supporting five programming languages in a sandbox environment to assist teachers with coding exams.
- Utilized different open source frameworks like isolate to perform code execution.
- Used docker for containerization.

Splitter | Android SDK, Kotlin, Firebase, Jetpack Compose

January 2024 – August 2024

- Developed an Android app to track and manage cost splits in real-time, helping users easily monitor shared expenses.
- Leveraged Firebase for secure authentication and database management to ensure seamless real-time synchronization.

Tick Tack Toe | Express, Typescript, Angular, Socket.IO, Node

September 2023 – October 2023

- Developed an interactive multiplayer Tic-Tac-Toe web application featuring real-time gameplay, user authentication, and a dynamic lobby system.
- Utilized modern JavaScript best practices and design patterns to create maintainable, modular code with comprehensive documentation.

HONORS AND CERTIFICATIONS

Machine Learning Specialization (Coursera, 2023)

Codepath Technical Interview (Codepath, 2024)

TECHNICAL SKILLS

Languages: Python, C/C++, SQL (Postgres), JavaScript, Typescript, HTML/CSS, Kotlin, C#.

Frameworks: React, NextJs, Django, ASP.NET, Angular.

Developer Tools: Git, Docker, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse.

Libraries: Pandas, NumPy, Matplotlib, sci-kit-learn, seaborn.

Software: Rive, Blender, Adobe Illustrator.
